WHO ARE INTERSEX PEOPLE?

Intersex is an umbrella term. Intersex individuals are born with sex characteristics that are either female and male at the same time or not quite female or male or neither female or male. Our sex characteristics and bodies are healthy variations of the human sexes.

Variations of sex characteristics might not be visible at birth. Intersex bodies can present themselves as intersex prenatal, at birth, during childhood, in puberty or in adulthood. A person may realize being intersex at a very early age or later on in life.
